Key Binds

Define hotkeys for the mouse and keyboard, remap keys or buttons and autocorrect-like replacements. Creating simple hotkeys has never been easier; you can do it in just a few lines or less!

What is AutoHotkey

AutoHotkey is a free, open-source scripting language for Windows that allows users to easily create small to complex scripts for all kinds of tasks such as: form fillers, auto-clicking, macros, etc.

ne? [_ \(https://autohotkey.com\)](https://autohotkey.com)

AutoHotkey has built-in commands for beginners. Experienced developers will love this full-fledged scripting language for fast prototyping and small projects.

LEARN MORE (</docs/AutoHotkey.htm>)

Why AutoHotkey

AutoHotkey gives you the freedom to automate any desktop task. It's small, fast and runs out-of-the-box. Best of all, it's free, open-source (GNU GPLv2), and beginner-friendly. Why not give it a try?

A peek at the syntax...

AutoHotkey provides a simple, flexible syntax allowing you to focus more on the task at hand rather than every single little technicality. It supports not only the *popular* imperative-procedural paradigm, but also object-oriented and command-based programming.

Here are a few simple examples:

1. Hotstrings & Hotkeys
2. Clipboard example
3. Short GUI
4. Simple Array (or Objects)

More examples at RosettaCode...

**[...] there's a tool that's
robust enough for power
users but accessible**

AutoHotkey (AHK) is the answer to all of your customization needs. [...] you'll be more productive than ever before!

Ben Stegner, MakeUseOf

Developers turn to AutoHotkey for its ease of use, power, and flexibility, which allow them to hone in on the tasks they are working on without the distraction of repetitive tasks.

Jon McDonald,
HostingAdvice

(<http://www.pcmag.com/article2/0,2817,2328732,00.asp>)

[...] save time, keystrokes, and mouseclicks by making your own customized shortcuts ... lift the burden of repetitive tasks—like typing email replies —by doing them for you.

David A. Karp, PCMag
